May 15, 2009

Dear colleagues and friends,

The 4th Congress of the International Society of Gender Medicine (IGM) will be held in Berlin on Nov 6-8, 2009!

We will discuss relevant issues in gender research from a broad spectrum of medical fields, in basic and clinical research, and health care, prevention, and medical education. The congress aims to promote gender research and to network gender researchers all over the world. It is supported by the International Society of Gender Medicine, its national member societies, the Organization for the Study of Sex Differences (OSSD), the German Heart Institute Berlin (DHZB), and the Charité-Universitätsmedizin Berlin. We will present the most recent data from a multidisciplinary project that aims at the definition of gender medicine and European curriculum development.

We cordially invite you to participate in this congress. We will accept abstracts for oral presentations and posters and award travel grants to the best.

For more infos, please contact our website (www.charite.de/gender) and have a look at the attached preliminary program.

With the best regards,

Vera Regitz-Zagrosek
Congress President

Karin Schenck-Gustafsson
President IGM
